

MONOMIX

Web3 Integration

Empowering the next generation of music creators through blockchain innovation.

Overall Summary:

Monomix is an all-in-one social and monetisation platform for the electronic music industry – built for artists, DJs, and fans. It unites collaboration, discovery, and financial opportunity under one roof: the **Remix Hub**, **Lessons Terminal**, **Live Bookings**, and **Fan Discovery** ecosystem.

As a standalone platform, Monomix has strong revenue potential from track sales, subscriptions, lessons, and live event bookings.

With the integration of Web3 tokenomics, Monomix will become the world's first creator-driven electronic music economy, rewarding both users and token holders to generate value for all.

Revenue Fuelled Buybacks

Once the MVP goes live (target **targeting 1 or 2 weeks**), **20% of all revenue** generated on the platform will be dedicated to:

- **Buybacks** – Direct repurchases of the Monomix token, creating upward price pressure and reduces the supply.
- **Staking Rewards** – A percentage of the buybacks gets distributed to stakers as reward.

- **Liquidity Locks** – Strengthening price stability and protecting investors.
- **Competition prizes** – We will host competitions on the platform and distribute cash prizes to our users.

This creates a **flywheel of value**:

Platform growth → Revenue generation → Token buybacks → Holder rewards → Increased adoption → Increased demand → Platform growth

The Solana Vision

Monomix will launch its native token on **Solana**. The token will be a centre piece of the project and will allow us to reward our community, hold remix competitions, and integrate the future of finance into Monomix.

This allows believers to stake \$Monomix to access free memberships, and receive airdrops of the token bought through buybacks from platform revenue. .

Key Token Objectives:

- **Fund MVP Launch** – The token sale provides early funding to accelerate MVP completion and attract top-tier development talent.
- **Reward Early Adopters** – Early holders will benefit from the platform's growth before traditional VC involvement.
- **Staking Rewards** - A percentage of the revenue generated buybacks will be airdropped to stakers.

- **Sustainable Growth** – A portion of all future platform revenue will continuously flow back into the token ecosystem through buybacks and liquidity locks. Benefitting holders and allowing us to hold competitions for \$MONOMIX rewards.

Token Launch Plan

- **Platform:** Solana
- **Launch Mechanism:** TBC
- **Utility:** Staking rewards, community governance, access to premium platform features, and hosting competitions.

This model ensures that funding directly accelerates product development, while early believers participate and benefit from long-term upside.

Transparency & Governance

Monomix operates with full transparency:

- All tokenomics and revenue data will be publicly verifiable on-chain.
- Holders will have community input on future feature integrations and platform direction.
- Smart contract audits and verified liquidity locks will ensure long-term trust and sustainability.

Development Roadmap

Q4 2025 – MVP Launch (Remix Hub, Messaging, Live Bookings, Integrated Payments).

Q1 2026 – Lessons Terminal + Fan Discovery rollout.

Q2 2026 – Global artist onboarding campaign + event partnerships.

The Vision

Monomix is more than a platform – it's a movement to empower artists financially and creatively.

By merging the power of Web3 with real-world creator monetization, we're building a self-sustaining ecosystem where artists thrive, fans connect deeper, and investors share directly in the success.

Monomix: The future of music, collaboration, and community. Built on Solana.
